P6	4	M10 x 1.5 Hex Nut	

Tools Required
Impact Driver
Socket Wrench
16mm Wrench
6mm Allen
5mm Allen
T25
T40

Step 1: Place vehicle on a flat and level surface. Place gear selector in "Park" and remove keys from the ignition.

Step 2: Remove the hardware as shown on (Figure A). Remove plastic cover, and remove the two bolts (Figure B).

Step 3: Remove Grill, and line up the front bumper with the four mounting holes (Figure C).

Note: Make sure that P3 (M10 X 1.5 X 40mm Stud) sticks out at least 7/8".

Step 4: Once the studs are in the upper mounting holes, install the Flat Washer, Lock Washer, and the Nut, in that exact order (Figure D).

Step 5: Add a flat washer to both bolts and install the hardware in the lower mounting points (Figure E). The bolts are installed facing in towards the vehicle. Then add another flat washer, a lock washer, and the nut.

Step 6: Tighten all hardware until the bumper is secured, and re-install all hardware removed from plastics.

Note: Figure F shows the bumper properly installed.

ProTip: Periodically check all hardware and re-tighten if needed.
