

FEEL THE HEAT!

Polaris 2 Seat Harness Anchor

Part # **14-1914** RZR 900 & RZR XP 1000 Black

Congratulation on the purchase of the DragonFire Polaris RZR 2 Seat Harness Anchor. This product was designed specifically to allow aftermarket 4-point and 5-point harnesses to be installed with the factory Polaris seats and keep the shoulder straps from sliding off the corners of the seat. This provides greater security and comfort for the occupants without having to break the bank by purchasing new seats to accommodate harnesses. Be sure to check out the full range of DragonFire products at your local authorized dealer or online at <http://www.DragonFireRacing.com>

Not recommended for aftermarket seats.

- Read and understand these instructions before installing product
- Do not use if there are signs of damage
- If rollover occurs inspect for damage and replace if needed
- Injury can result from rollover, use this product with caution
- Improper installation may result in harness failure

Tools Required

3/4" Socket & Ratchet

3/4" Wrench

Disclaimer

Off road activities can be hazardous and could lead to injury, dismemberment, paralysis and death. No warranty of representation is made as to the products ability to protect the user from any injury or death. The user assumes that risk. The acceptance and /or use of this merchandise purchased from DragonFire by the customer hereby shall release DragonFire from any and all liability pertaining to the use of such merchandise.

Step 1: Place vehicle on a flat and level surface. Place gear selector in "Park" and remove keys from the ignition.

Step 2: Align DragonFire Harness Anchor on cage tabs behind seats and install with supplied hardware. The tubes on the anchor should be towards the seat. (Figure A)

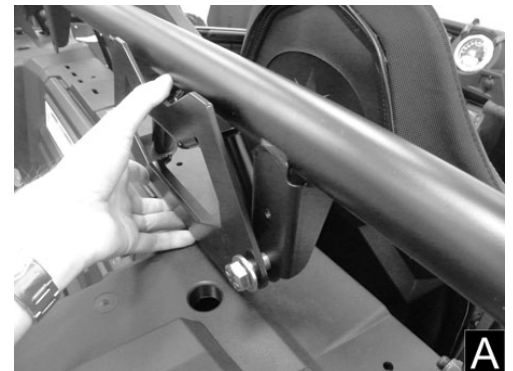

Step 3: Torque hardware to 75 ft-lbs.

Step 4: Install harness per harness manufacturer's specifications. (Figure B)

Step 5: This completes the installation. Time to ride and enjoy!

ProTip: Periodically check all hardware and re-tighten if needed.
