

POLARIS RZR GRILLE

2012-2013 POLARIS RZR GRILLE

GRILLE INSTALLATION INSTRUCTIONS

10" SR-SERIES™

KIT INCLUDES

(1) LED Grille Bracket

(2) Light Mount Washers – ¼" Flat Washer

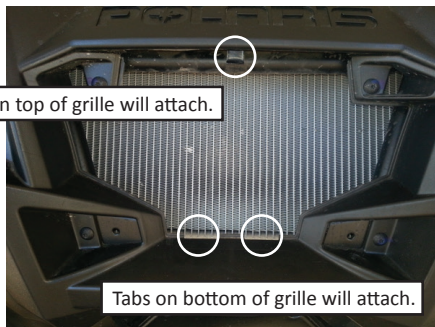

IMPORTANT

It is strongly recommended that this product be installed by a professional.

Installation of this product requires cutting of your factory installed grille. Your factory grille will be unusable after it has been cut.

This product may have more surface area than your factory grille. It may reduce airflow. Reduction in airflow can potentially lead to overheating or other mechanical issues.

Always disconnect battery before servicing any fuses or electrical system.

INSTALLATION INSTRUCTIONS

1. Remove existing grille from vehicle (pull release tab at top of grille.)
2. Remove hood plate and underlying plastic shield to gain access to the area in front of the radiator.
3. Remove metal clip located directly above the grille location (held in with one screw.)
4. Insert Rigid light bar grille. First insert bottom of grille with two tabs, then push top of grille into place.
5. Rotate clip on top center grille bolt so that it is facing up. This clip will line up with a hole/boss in the plastic grille frame where you just removed the metal clip.
6. Insert the original factory screw to secure clip to grille frame.
7. Mount and aim your Rigid light bar. Tighten mounting nuts.
8. Install switch and route wire harness per instructions provided with Rigid light bar.

Your installation is now complete.
