

# **ROUGH COUNTRY**

## **RECOVERY SYSTEMS**

### **24' ELECTRIC WINCH WIRING EXTENSION**

**Thank you for choosing Rough Country for all your Off road needs.**

Rough Country recommends a certified technician install this system. In addition to these instructions, professional knowledge of disassemble/reassembly procedures as well as post installation checks must be known. Attempts to install this system without this knowledge and expertise may jeopardize the integrity and/or operating safety of the vehicle and components.

Please read instructions before beginning installation. Check the kit hardware against the product layout and kit contents information on back page of these instructions. Be sure you have all needed parts and know where they go. Also please review tools needed list and make sure you have needed tools.

#### **TOOLS NEEDED:**

Cutting Tool  
Zip Ties

#### **Kit Contents:**

1-24' Section of Positive/Negative Wire w/coupler  
1-Wiring Coupler

#### **INSTRUCTIONS**

1. Measure distance from Battery terminal to winch location.
2. Cut the black and red wire to length. It is always advisable to allow for some slack in the wire in case the wire does need to be repositioned at a later date.
3. Strip away approximately 1 inch of wire coating.
4. Locate included coupling and insert uncoated wire into the coupler making sure that the bare wires make contact with the connectors inside the coupling. Make sure the wire is secure in the coupling.
5. Route the wire away from sharp edges and moving parts. Secure using zip ties.

It is advisable to periodically check the wires to make sure they are maintaining a good connection and away from moving parts and sharp edges. Failure to perform this maintenance could result in winch failure.
