

## YXZ SHOCK COVER INSTALLATION

**YAMAHA YXZ** shock covers are packaged as fronts and rears.

- **Wrap shock cover around spring as in image above with hook and loop closure toward inside of machine.**
- **Shock cover should be longer than spring so the elastic can draw cover tight around shock body.**
- **You will need to remove shock cover periodically to rinse out any mud or debris that may have entered shock cover and inspect shock as you would with normally.**

Your UTV has several warning and caution labels around the machine that may be covered when this cover is installed. It is your responsibility as the UTV owner to read and understand these warnings as well as making sure anyone who operates the UTV is aware of the proper operation.
