BASE-CLAMPS
HOW IT WORKS:

STEP 1
Select the right size clamp *(Various sizes sold separately)*

STEP2
Select the base & ring clamp that coincides with what you need to mount 2A. Use protective film to prevent any paint damage 28.
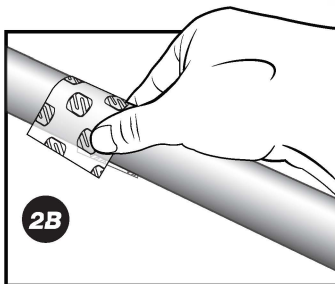

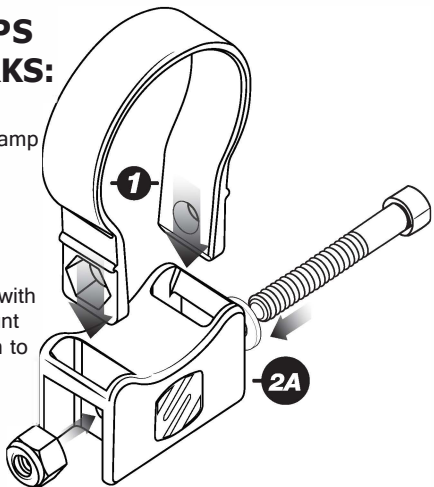

STEP3
Lock it in place

The self locking clamp design allows for easy for easy one person installation. Simply slip the clamp over tube and lock in your base, secure using the stainless mounting hardware and you are ready to Mount Up and Move Out.

CLICK ///// ////// **CLICK**

NOTE: Ring clamps 2" & over in size may require pre-stretching to help spread the clamp over the tube. (Use Protective film when mounting)

DEVICE SETUP GUIDE

MOUNTING ADAPTER for GoPro®

Requires GoPro® camera with waterproof case (not included).

1. Attach ball adapter to the mounting base as show below.

2. Place the camera case onto the adapter so that the two mounting brackets on the case fit between the (3) mounting brackets on the adapter as shown (A). Make sure the holes on both sets of brackets are aligned.

3. Insert the threaded end of the clamping arm into the bracket holes (B), and thread into the threaded nut at the opposite end and tighten until snug (C). Loosen the arm to adjust the angle of the camera.

1/4' THREADED MOUNTING ADAPTER

for devices with a 1/4" threaded mount

1. Attach the ball adapter to the mounting base as shown on the following page.

2. Screw the 1/4" threaded mounting adapter directly into the 1/4" mounting hole on device.

PSM31001

Camera/GoPro® Mount Base

STEP 1

Choose a mounting location (D).

STEP 2

Mount base to the appropriate sized clamp ring for the vehicle **(E*)**.

Note: Do not exceed 200 inch-pounds
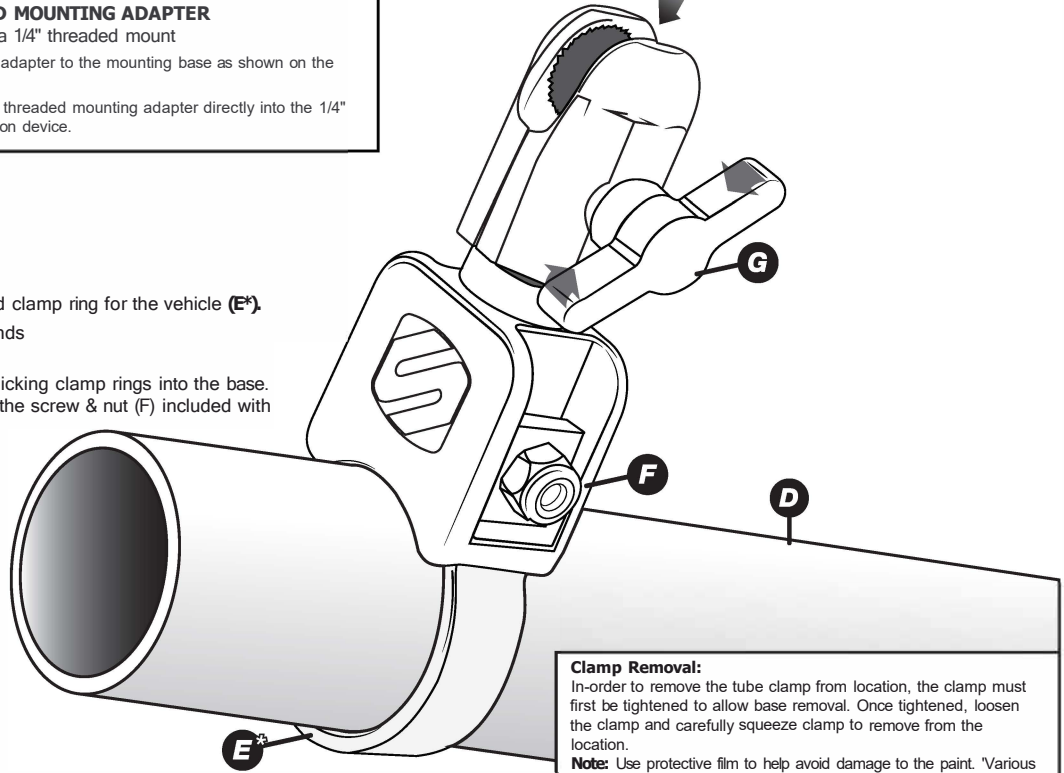

STEP 3

Position the base into location by clicking clamp rings into the base. Then use a 3/16" hex key to fasten the screw & nut (F) included with the ring clamp*. Continue until clamp is tight and does not move.

Note: Do not exceed 200 inch-pounds

STEP 4

Tighten/Loosen the ball and hinge joint using the mounted turn knob (G) on the mount base.

Note: Use the knob to loosen, tighten or switch-out the 1/4" -20 screw mount {I) or the GoPro® mount (H).

Clamp Removal:
In-order to remove the tube clamp from location, the clamp must first be tightened to allow base removal. Once tightened, loosen the clamp and carefully squeeze clamp to remove from the location.
Note: Use protective film to help avoid damage to the paint. 'Various ring clamp sizes available (sold separately w/ hardware
