UTV beds can reach temperatures of over 140 degrees. To keep that heat down, we used Military Grade Heat Deflection material on the bottom of the Dog Pad, sew a mildew resistant Foam Padding inside; we then cover it with Cordura® Fabric that is mildew resistant, rip, tear, and abrasion resistant.

RB01059

Ruff Rider UTV Pet Pad with Heat Shield for RZR 900 comes with two sections:

- Place the RB01063-Ruff Rider Bottom Shield into the bed of your RZR 900 model with heat shield facing down
- Place the RB01062-Ruff Rider Top Shield on top, attaching the two sections with the velcro strips

Cleaning Instructions

- Use Mild Detergents when cleaning pad (Do Not machine wash)
- Avoid Bleaches and Chlorine cleaning agents
- Air Dry

WARNING

- Do Not Expose to open flame
 - Always ensure that the thermal heat deflector portion of Ruff Rider Pad is always towards machine surface. Make sure RBO Logo is always facing up
 - Please feel the top of pad with your hand to confirm the pad is cool enough for your pet
- (Note placing top of pad in direct sunlight will create heat in top of pad.)
- Please use common sense when it comes to pet safety. It is up to you to be responsible for your pet's safety and wellness
