

## ***RACER TECH – RZR XP 900 FRONT CAGE MOUNT INSTALLATION***

Thank you for your purchase! We hope you will find this kit as useful as we have. This is a pretty straight forward installation but here are some guidelines to help you along:

1. Remove hood from RZR. Please refer to a factory service manual for this part of the installation.
2. Remove the original Front Cage Mounts. **BE SURE TO KEEP THE ORIGINAL MOUNTING HARDWARE.** This will be reused.
3. Align the new front cage mounts by reinstalling the original hardware in the pre-existing holes.
4. Use a 5/16" and 3/8" drill bit to create the necessary new holes. There should only be three holes needed per side.
5. Use the supplied hardware to complete the final assembly of the Front Cage Mounts. Use supplied washers as needed to space the front outer-most bolt out for clearance for nut.
6. Tighten all fasteners.
7. Reinstall hood. Please refer to the factory service manual for this part of the installation.

Enjoy your next riding experience knowing you have one less thing to worry about breaking!

**If you have any questions regarding this product or the installation feel free to call or email us any time of the day for assistance.**
